## Description

This drill is a fast moving warm up drill that get each player a lot of touches and goalies a lot of shots. Ptwo lines in the corner, one at the face off dot and one along the boards. If you have two goalies and enough players you can run it out of both corners at the same time. A coach or player should also be stationed just inside the far blue line. The first two players pass the puck down the ice until towards the coach and pass them the puck just after they cross the red line. The two players then swing in front of the coach and receive a pass back from the coach. Once they receive the pass the two forwards transition right back towards the coach and attack the net 2 on 0.
