Description

This drill is a good warm up drill with lots of passing and skating fundamentals. Players line up in four equal lines along the boards at each blue line. Each line should have pucks. On the whistle the forst two players from opposite lines start by carrying a puck to the opposite blue line. At the blue line they tranistion to backwards while maintaining possession of the puck and moving their feet. They pass to the first player in the line at that blue line and receive a pass right back. Once they receive the pass the player transitions to forwards, skates up ice, and makes a pass to the first player in the far line. The player receives a pass right back and then goes in for a shot on net. Players should try to receive the pass quickly, gain control, and get a shot off by the top of the circles.
