Description

This is a drill for more advanced players. Players will work on one-touch passes while skating forwards and backwards. P1 starts the drill by passing to P2 and skating towards P2. P2 passes right back to P1 and P1 continues to skate in a circle around the neutral zone face-off dots. P1 makes a give and go with each line as they skate in the circle. When they pass the line in which they started, the player pivots backwards and continues to skate in a circle through the neutral zone while performing a give and go with each line. After receiving a pass from the last line (in this case P3) they pivot forwards and go take a shot on the goalie. Challenge players to move their feet the entire time and stick handle as little as possible.
