Components:

Key points :

Description

To set up this drill, place two lines of players on opposite blue lines. On the whistle, P1 makes a pass to the yellow coach and skates to the middle of the ice to receive the pass back from the coach. At center ice P1 makes another give & go with P2 and skates in for a shot from the high slot. After the shot, P1 stops and backchecks against P2. P2, after making the pass back to P1, starts the same thing by making a pass to the orange coach. The focus of this drill is to get players in the habit of stopping and starting when there is a turnover. Most kids will want to make a turn, try to discourage the turn and get them to stop and start.
