Description

This hockey drill is a variation to the previous drill, Findland Warm Up 1 on 0. This time both players start at the same time side stepping along the goal line until they get to the boards. At the boards the players skate forwards out to the top of the circles and transition backwards around the bottom of the circle. One of the players will receive a pass from the coach and then both players continue down the ice 2 on 0. The player who has the puck at the blue line should stay wide while the supporting player either drives hard to the net or stays high in the slot.
