Key points :

Description

This can be a good warm up drill that will get the goalies lots of shots and forwards a chance to work on opening up and making themselves available in the neutral zone. F1 & F4 start the drill by making a pass to the line across from them (F2 & F3) they then skate out across center ice and open up so they are always facing the puck. They then receive a pass back from either F3 or F2 and go in for a shot. Once the shots are taken, F2 and F3 do the same thing.
