Description

Here is another warm up passing drill to add to your drill bank. Set up one line of players on the neutral zone faceoff dot and the other line on the face off dot diagonal from the first line (shown in the diagram). P1 starts by making a pass to P2 and skates around the opposite neutral zone face off dot. Players should pivot around the cone so they are always facing the puck. P1 receives a return pass from P2 around the red line and skates in for a shot on net. After P2 makes the pass to P1, they make a pass to P3 and do the sam thing on the other side. This can also become a 2 on 0. P2 can drive the far post after making the pass to P1.
