Description

The Shoot & Go starts is a fun way to end a practice. Starting from the high slot, two players make as many passes as possible before the hash marks. The player with the puck at the hash marks has to shoot. Both players then race around the cones to a puck that the coach sets out around center ice. The player that wins the race earns the right for a break away scoring chance.

This is an elimination game. In order to stay in the game, a player must score on one of the nets. If a goal is scored on the 2 on 0, then both players are safe. If a goal is not scored on the 2 on 0 then the two players have to race for the puck and a chance to stay in the game.
