Description

This is a simple drill that can be run from four lines, each starting at the Blue line. This is meant to be a warm up drill, especially for the goalies. Therefore it is important to make sure the shots are spread out enough to give the goalies a change to set up for each shot. The forwards need to make sure they are shooting from their designated lane as well so the goalies are getting shots from all three lanes. The first shooting shoots from outside the face off dots on the far side. The second shooting shoots from the center of the ice, and the third shooter shoots from outside the dots on the near side.
