Title : Triple Give & Go Full Ice

Content elements :

Components:

Key points :

Description

This is the full ice version on the Triple Give & Go. If there are enough players, then this drill can be run from both corners at the same time. D1 starts by carrying the puck around the net and making a pass to F1. D1 gets the puck back from F1 and then performs another give & go with F2. After they make the pass, F1 & F2 go to the net and receive a pass from D2. D1 continues down the ice and passes to the last player in line, in this case it is D6. D1 get the puck back from D6 and then shoots on net. D1 then becomes the last player in line so they will be receiving a pass from D2 as they come down the ice.
