2 V 0 TO 2 V 2 FULL ICE BACKCHECK

Time: **Station:**

The Full Ice 2 V 0 to 2 V 2 Backcheck is a full ice drill that helps players practice rush attack at full speed, with pressure from backcheckers.

Setup

- Set up players in all 4 corners of the ice.
- On the whistle, 2 players go down the ice 2 on 0.
- After they take a shot (or a coach blows a whistle), 2 players skate down the ice 2 on 0, and the 2 players that just finished their shot, quickly transition into a full ice backcheck.
- The backcheckers work to break up the 2 on 0.
- The drill is continuous.

Coaching Points

- Offensive players:
  - Underhandle the puck and use full strides to try to gain distance from the backcheckers.
  - Keep your head up to see if your teammate is open or covered by the backchceker.
  - Increase your scoring chances by shooting in stride, or passing to your teammate for a quick release shot.
- Backchecking players:
  - Use full strides to try and catch the offensive players.
  - Skate towards the middle of the ice with your stick on the ice to prevent passes.
  - Communicate with your teammate.

Variations

- Can set this up to be in between the blue lines to make this a shorter, quicker transition. View 2 V 0 Continuous Backcheck.

- Attackers can start further back by the goal line or up by the hash marks depending on the type of challenge you would like to present to them.
- Coaches can have the backcheckers start on the whistle or after a shot is taken.
