2 VS 2 WITH POINT SHOT - BOX OUT

Time: **Station:**

Set Up

- two offensive players and two defensive players start down low
- two defense on the blue line on offense
- coach plays a puck anywhere down low
- the offensive players try to win possession and get the puck to the point
- the defense at the point move the puck D to D
- the defense down low try to box out the forwards so the goalie has a clean view of the shot

Points of Emphasis

- work hard for puck possession down low
- when the puck is moved to the point then get the puck to the middle of the ice for a quality shot
- shooters should be looking for tips and to create rebounds with their shot
- defenders down low need to box out and give the goalie a clean view of the shot
- defenders down low need to get the forwards stick off the ice to prevent tips and rebounds
