2V2 SHOOTING BOARD

Time: **Station:**

Players are divided into two groups positioned above the face-off circles. Each team has two players battling in front of the net and one “shooting board” (a player stationed at the top of the circle) ready to shoot. The coach, positioned inside the blue line with pucks, starts play by passing a puck into the zone. On every turnover, the team that gains possession must first work the puck to their shooting board before attempting to score. Players change on the coach’s signal.

Objective:

Teach defenders how to protect the net and deny scoring opportunities from non-puck carriers while challenging offensive players to create space and generate screens, tips and deflections. The drill reinforces defensive positioning, box-out skills, and net-front awareness, while promoting offensive habits like puck recovery, puck movement to the point, and net-front traffic.

Coaching Points:

- Cut off passing lanes and protect the middle of the ice
- Battle for positioning in front of the net and work on box-outs
- Create traffic and screens to challenge the goaltender
- Have players work on getting into areas for high-tips
- Stay alert and ready to recover loose pucks
- Maintain body positioning and awareness of both puck and opponent
