DOUBLE REGROUP 2 ON 1

Time: **Station:**

The Double Regroup 2 on 1 is a drill that helps players practice the transition and timing of a regroup before fishing with a 2 on 1. This can also progress to allow the players to use their trailing defenseman so it is a 3 on 1 or you can set it up to be a Double Regroup 3 on 2.

Setup

- Split up your forwards and defenceman and have them break up evenly into two groups at opposite blue lines (as shown in the diagram).
- On the whistle, 2 forwards and 2 defencemen leave the blueline. One defenceman skates backward and the other will trail the group to be ready for a regroup.
- The forwards regroup 2 times before fishing the drill with a 2 on 1.
- The second group on the opposite blue line begins on the coach's whistle or after the 2 on 1 passes them.
- This drill is continuous. Coaches should run this on both sides of the ice and also allow defencemen & forwards to get reps at both positions.

Coaching Points

- Forwards:
  - Keep your stick on the ice to give your teammates a passing target.
  - DO NOT stare at the puck. When you are regrouping, practice looking up ice first before you receive a pass back. Practicing the habit of keeping your head up and looking up ice before you get a pass will be extremely beneficial during games because during a game a defenseman could easily step up on you in the neutral zone.
