MIRROR ANGLING

Time: **Station:**

Overview

The purpose of this drill is to work on net frives for forwards and angling for defensive players. f We love the "mirror" start to this drill to dial in some edge-work reps that often happen in game situations.

Set-Up

- 2 cones about 10 ft apart for the forward
- 1 cone in line with the first forward cone for the defense
- This is a 1v1 drill that can be located in different areas of the ice
- On the whistle both players go
- Forward player does a tight turn around the first cone and then skates outside of his or her second cone
- The defensive player keeps his or her toe caps up ice with a pivot and then skates forward to defen

Coaching Points

- Offense: protect the puck and cut through the hands of the defender with your body to win position and get yourself a scoring chance
- Defense: Match puck carriers speed, angle and steer with stick and defend skating forward. Try to keep the forward from cutting to the inside.
